Open Mind is a lightweight software application built specifically for helping you create mind maps with the aid of customizable bubbles, text messages, images, and other objects. User-friendly interface You are welcomed by a well-organized set of functions that allows you to carry out most operations with just a few clicks. Everything is kept as simple and clear as possible, so even rookies can master the entire process in no time. Main features Open Mind gives you the possibility to create a new bubble, add various geometrical figures (e.g. arrows, callouts, stars, symbols, flowcharts), choose the color, and insert text messages, which can be customized in terms of font, font style, and size. What's more, you can print or export the information (PPT, DOC, PDF) to a file, duplicate bubbles, delete items, embed a file in the mind map, zoom in or out, undo or redo your actions, as well as activate the spell checking function. The tool lets you perform search operations, insert lists with different items, choose between several preset color themes that can be applied for all bubbles, use hotkeys for a better control over the entire process, and connect bubbles with the aid of lines. The lack of configurable settings makes it an ideal tool especially for rookies who don't want to spend a lot of time configuring various parameters. Tests revealed that Open Mind carries out a task quickly, and no errors showed up throughout the entire process. Bottom line To sum things up, Open Mind offers a simple and efficient software solution when it comes to helping you generate mind maps. This key is intended to be used as an accent in the music. Its main purpose is to create a very short pause in the middle of a musical piece of any genre. However, a well-placed key can serve to introduce an interesting mood in the music, or even an idea or a movement in the song. Key: Intro: 1 x 10 x 8. Key: Hold (1) 3s: Intro: 2 x 8 x 7. **System Requirements For Open Mind:**

Your printer needs: -- Standard USB interface -- Power supply of at least 5.0 watts -- Spool of filament -- Printable material (14% infill) This tutorial uses a 12.5 mm x 14 mm square tube (which I found in an antique shop in France) as a test object. You can use any tube you like, but you should print at a larger scale than you do in the following video. The following source code will work with any open source slicer of your choice. I have tested it
