this is the beginning of a new chapter in the success story of our lyrical series. It's a composer's toolkit built for recording thoughts and ideas, and containing all of our rich interpretations on the subject: in real time, in audio format, in digital form and in synthesizers. Our tools allow composers to create music by expanding their arsenal with samples, arrangements, synths and mix systems using a variety of themes, images, instruments, styles and textures! - Do you plan to include other audio effects tools in the SoundForge audio format? C M. V.: Yes, we will continue to include three other sound processing programs in Sound Forge that are in line with current trends in musical equipment. It is important that all of them are now included in the general improvements. We will also use resources from external studio services such as SoundCloud or Google Music. This will allow you to easily add all these instruments to your music without any problems.

Introduction Sound Forges Music Computers charts: - Music recorded in real time! - Everything sounds fresh, unexpected and interesting! - All instruments look exactly like they do in Soundforge music!
