Tromine GT

Tromine GT is a sample based virtual analog drum synthesizer with modulation, delay, reverb, and chorus effects, and user control of all the parameters. The plugin is designed for live use with any sound source that can be plugged into a mixing console. The modular design allows you to use a variety of effects or apply them to different parameters to customize your sound. Features: * Analog drum synthesizer: Similar to Roland's TR-808, but with more musical feel and touch sensitivity. * All the familiar features: Up to three voices, 8 side-chain outputs, U-Turn, Auto-Tune, and custom user controls. * Chorus and delay effects: Chorus for adding space and depth, delay for space and pitch shifting. * More U-Turn. * Not 8-bit only. * Sample-based. Can be played live. * A/B comparison of eight conventional or custom drum synthesizers, ranging from most conventional through experimental to past and present experimental drum synthesizers. * Modulation effects such as pitch-bend, twist, flange, and ring-mod. * Filters, EQs, and faders. * You can use multiple voices in one track. * The capability to record and playback. I will update this post from time to time, as I add new information on this plugin. An Introduction to Tromine GT Picking sounds with the Tromine GT Lets see how it works on drums. Setting the default parameters How to use the 16 sounds You can change the drum sounds to different set of parameters. The 16 different sounds that come with the plugin include some of the most popular and well known drum sounds that you will find in the market. You can change the number of sounds you want to use, from 2 to 16. Changing the size of the sample can change the sound. Creating drum loops A loop in the plugin is a sample with an Auto tune effect. You can record your drum sound and apply the auto tune effect to change the pitch of your sound. Once you are done recording the sound you can save it to the session. You can loop drum sounds for as long as you want. Playing the drum sounds Once you have your looped drum sound saved to the session you can use the pedal to play it. I will have
