Panoramic Editor Download

Displays text messages on the screen as you type. To set the message, type in a message and then go to the Options window to enter a key. A red minus sign or green plus sign will appear where the text appears on the screen when you press the key. Filtering Mode: Add your own text with the Macro Dialog. With the default mode, any message in the Macro Dialog is added to the Keyboard. With the Filter Mode, only the messages in the Keyboard are added. To enter a message in the Macro Dialog, double click the Keyboard and then click the Blank Line in the Keyboard. You can also use the keyboard commands described below. Keyboard Command: Delete the selected messages (Ctrl+D) or clear the keyboard (Ctrl+K). Help File: Go to the Microsoft website and search for the documentation for this program. Macro Dialog: Edit messages in the Macro Dialog. Maximum # of characters: The maximum number of characters. Maximum Keystroke: The maximum number of keystrokes that can be used with this macro. The default value is 4. Minimum Keystroke: The minimum number of keystrokes that can be used with this macro. The default value is 1. Show Keystroke: Show keyboard commands. Show Symbol: Show the symbols and numbers. Symbol: Select the symbol for this key. URL: Go to the Microsoft website and search for the documentation for this program. Max Characters (Macro): Add a text string to the screen. Max Shortcut Length: The maximum number of characters that can be used as a shortcut. The default value is 10. Show Cancel Button: Show the Cancel button in the Options window. The default value is yes. Max Shortcut Length (Macro): Add a text string to the screen. Match Case: Case sensitivity when comparing a key combination with the current selected message. Message Color: For each message, specify the background color for the displayed text. The default value is white. Message Font: For each message, specify the font for the displayed text. Message Font Color: For each message, specify the font color for the displayed text. Message Line Color: For each message, specify the color of the message line. The default value is black. Message Style: The style for the displayed message. The default value

Panoramic Editor is a simple text editor, with most of the space dedicated to writing code, while an upper toolbar provides quick access to several editing options, such as font and size selection, as well as file management functions. Simple design and syntax highlighter You need to know your way around when using the application, in the sense that your BASIC programming language level of knowledge must be advanced. There's an integrated syntax highlighter that cleverly displays all strings and functions, with the possibility to customize colors shown on screen. Far from being a pro of its kind Overall, the feature set is rather poor, with emphasis only on code writing and building an application you design. There are options to quickly find text strings of interest and replace lines. There's also the possibility to disable line counting for more comfort. When your work is done or you simply want to test it out, hitting the "Run" button is all there is to it. However, if there are multiple errors in your code, not all of them are displayed, although you are pointed to the first prompt at the line of occurrence. Convert strings and gather color codes There are several other tools that come in handy if you work with colors. These refer to conversion, and can be applied to strings, codes of keys, RGB coloring, with each only displaying the code without the possibility to have them automatically inserted in your project. A few last words Taking everything into consideration, we can say that Panoramic Editor is not the best of its kind when it comes to compilers and builders, with alternatives that come with greater sets of features. However, if you fancy working with BASIC code, it can greatly come in handy through its simple interface, built-in convertors, as well as syntax highlighter. Need a professional website for your business? Our experienced and knowledgeable web design team are on hand to provide you with a full suite of web design services to help get your business online. Whether you want a professional website for your company, an e-commerce store or you just want a few pages for your portfolio, we can help! We have the knowledge and skills to assist you with creating a great looking website that will keep your customers coming back for more.
